U. - Uncertainty of measurement is expressed as double the standard uncertainty and characterizes the interval value in which it is possible to expect the real value with a probability of 95%.

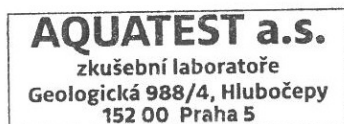

This uncertainty does not include sampling uncertainty and is not stated for results below the detection level.

A - accredited method

N - non-accredited method

Approved on behalf of the laboratory :
Manager quality - Ing. Olga Janinová

Done in Prague : 13.5.2021

A handwritten signature in blue ink, appearing to read "Janinová", is written over the logo area.
